

## **Specialist Health & Safety Waste Management & Transport Law**

Our Consultants are able to advise and assist you on:

- Health and Safety systems and record keeping, appeals, assisting you in the immediate aftermath of a health and safety incident and with accident investigation.
- In addition, specialist advice on all aspects of Transport Law including Operator Licensing; planning and environmental issues; prosecutions brought against the haulage industry; vehicle excise duty problems; advice on liens and conditions of carriage and general commercial work.
- Renewable energy, minerals and contaminated land, are areas of very specialist legal work and our consultants are able to advise of these. Including mineral extraction, property development and after use agreements.

Please contact us for an informal discussion of the problem or issue.
